PROFILE

Full Stack Developer with 2 years of experience delivering scalable web applications across the stack. Committed to writing clean, maintainable code that drives real business impact

PROFESSIONAL EXPERIENCE

2024 — Present

Full Stack Software Developer, Bynet-Kaleidoo

- Developed a Server-Sent Events (SSE) microservice to stream real-time generative AI responses (in token batches) for an interactive chat

- Built a real-time call translation feature: React UI for language selection, WebSocket translation mode, and a Socket.IO service consuming RabbitMQ translation streams—delivering sub-500ms multilingual translation for enterprise calls.

- Designed and implemented cursor-based pagination with MongoDB aggregations and scalable infinite scroll UI, integrated with hybrid storage (MinIO/GCS) for file management—enabling smooth browsing of 100K+ files stored across multi-tenant buckets, cutting load time by 80%.

- Worked in a 6-member Agile team (4-week sprints), contributing to microservices development, daily stand-ups, sprint planning, retrospectives, and code reviews

- Containerized and deployed services using Docker and Kubernetes, integrated into automated CI/CD pipelines for consistent multi-environment delivery.
